REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or fairly teach a platform having an elongated top surface for supporting the work piece substantially adjacent to the working surface and a front surface with a plurality of lateral grooves for receiving the raised areas on the working surface such that movement of the platform toward the working surface into a working area adjacent the grinding wheel enables the raised areas to pass into the lateral grooves and grind the work piece; where first means for supporting the work piece and moving the work piece laterally toward the grinding wheel into a working area adjacent the grinding wheel for grinding the work piece comprises a platform as disclosed on pages of applicant's specification; a grinding wheel; a support for holding the work piece and moving the work piece laterally toward the grinding wheel into a working area adjacent the grinding wheel for grinding the work piece; a first spindle and collet positioned in front of the working area for rotating the work piece and for moving the work piece one or both of forwardly and backwardly through the working area; a spool for holding wire stock; a gripper for pulling a length of the wire stock from the spool and transmitting the length of wire stock through the first spindle and collet; a cutter for cutting the length of wire stock to provide the work piece; a second spindle and collet positioned behind the working area for rotating the work piece and moving the work piece one or both of forwardly and backwardly through the working area independently of the moving by the first spindle and collet. The closest prior art, to Talalay et al, 4,271,639 or to Mills, 3,479,773, does not disclose the claimed support, or the claimed

combination of a grinding wheel, support, first spindle and collet, spool and gripper, or the same combination with a second spindle and collet operable independently of the first spindle and collet. '639 does not disclose a platform having grooves for receiving raised areas of the grinding wheel, or the combination as claimed. '773 does not disclose the combination of first and second spindles and collets where the second spindle and collet moves independently of the first spindle and collet.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
